İstanbul Havalimanı Airport Hotel'de SARAY Ahşap Desenli Alüminyum Profil tercih edilmiştir.

SARAY Wood Effect Aluminium Profiles used at Istanbul Airport Hotel.

Elektrostatik toz boyası ile boyanmış alüminyum profiliin yüzeyine süblimasyon yöntemi ile ahşap desen transferi gerçekleştiriliyor. Kullanılan boyalar atmosferik etkilere karşı dayanıklıdır. Bu yöntem ile alüminyum profil yüzeyinde kalıcı ahşap desen oluşturulur.

Ürünlerimiz Qualicoat Kalite Belgesi standartlarına uygun olarak üretilmektedir.

The wood pattern is transferred to the surface of electrostatic powder painted aluminum profile by sublimation method. The paint, used in the process, has durability to atmospheric effects. With this method, a permanent wood pattern is created on the aluminum profile surface.

Our products are produced in accordance with the Qualicoat Quality Certificate standards.
